

My name is Andre Perry and I am a nursing student at Howard Community College. I expect to graduate in the Spring of 2019, as a Registered Nurse. I enjoy photography and spending time with my family. The field of nursing is a big change for me because I was a former outside Telecom Technician for twenty years. Once I complete the RN program at Howard Community College, I'd like to continue my education and eventually enter the field of Nursing Informatics. I feel with the combination of my past experiences as a Technician and my current field of nursing, this would be a perfect match. I am unique, because of my age and background, and I feel I will make a positive contribution to the "Image of Nursing." I may even inspire others who are considering a career change to consider the exciting field of nursing.
